
Step 1 - Starting the Overlay Utility

Example Actions:

1. Type STRAFPU on the command line.
2. Press the Enter key.

The IBM Advanced Function Printing Utilities for iSeries menu appears.

```
AFPU          IBM Advanced Function Printing Utilities for iSeries

Select one of the following:

Overlay Utility
  1. Work with source overlays
  2. Work with source overlay files

Print Format Utility
  11. Work with PFD definitions
  12. Work with PFD definition files
  13. Print database file member
  14. Print AFP Utilities tutorial

Resource Management Utility
  21. Convert to page segment
  22. Work with overlays
  23. Work with page segments

Selection or command
===> 2

F3=Exit  F4=Prompt  F9=Retrieve  F12=Cancel  F16=System main menu
(C) COPYRIGHT IBM CORP. 1991, 1996
```

From this display, you can select any function of AFP Utilities for iSeries.

The overlay utility functions are:

Option	Function
1	Work with source overlays
2	Work with source overlay files

Before you create a source overlay, you must create a source overlay file to store it.

Note: You need a library to create a source overlay. OVLLIB is used in the following example, but you may use the name of your library instead. If you do not have any libraries, create a library by typing CRTLIB OVLLIB on the command line and pressing the Enter key.
