

Deliverable (DL)	Description	Estimated frequency/ Volume	File / form at type
DL 1.5.1. Protocol for evaluation of the ECDC Hospital network	The evaluation protocol will clearly identify and describe the attributes to be evaluated (these could be related to the SARI surveillance or the vaccine effectiveness studies). The protocol will include: background, objectives, assumptions, description of data sources/countries which will be included in the evaluation, the methodology to perform the evaluation (such as focus groups, surveys, questionnaire/s, revisions of literature, data quality assessment, historical data assessment, websites revisions and analysis), challenges, limitations, references, annexes.	Two times during the FWC	Word - ECDC template
DL 1.5.2. Report of evaluation of the ECDC Hospital network	Report on the evaluation of the ECDC Hospital network, based on the data collection and implementation of the protocol. Report will include: summary of the evaluation, aim, general background, objectives, methods, description of data analysis and collection, questionnaire/list of variables, results by different methods used to conduct the evaluation, summary of findings, discussion, conclusion, recommendations and plans on how to implement the recommendations, references, annexes.	Two times during the FWC	Word - ECDC template
<p><i>Task 6: Training and capacity building</i></p> <p>Capacity building is considered an essential part of this lot. The contractor shall ensure that by the end of the project all sites will build enough capacity to be able to independently implement the protocols, validate data and contribute to the ECDC Hospital network activities and aims.</p>
