

Specifies whether the size of the image in the page segment is changed or not.

The possible values are:

**\*SAME**

Specifies the same value used for this parameter when you previously created a page segment of the same name. If this is the first page segment, the default value is \*NO.

**\*NO** Specifies not to change the image size.

**\*YES** Specifies to change the image size.

If you specify \*YES, the IMGSIZE and MAPPING parameters will appear, and you can specify the new image size in the page segment and how to map the input image to the size.

**Image area size (IMGSIZE)**

Specifies the unit of measurement, width, and length of the image to be created in the page segment.

**Unit of measure**

Specifies the unit of measure used to specify the following two parameters.

The possible values are:

**\*SAME**

Specifies the unit of measure used when you previously created a page segment of the same name.

**\*INCH**

Inch is used as the unit of measure.

**\*CM** Centimeter is used as the unit of measure.

**Width** Specifies the width of the image to be created.

The possible values are:

**\*SAME**

Specifies the value of the width used when you previously created a page segment of the same name.

*width-value*

Specify the width value in the selected unit of measure.

**Length**

Specifies the length of the image to be created.

The possible values are:

**\*SAME**

Specifies the value of the length used when you previously created a page segment of the same name.

*length-value*

Specify the length value in the selected unit of measure.

**Mapping option (MAPPING)**

Specifies how the input image is mapped to the specified size of the output image in the page segment.

The possible values are:
