

The following table explains each field in this display.

Field Name	Description You can move the list view window by entering one of the following commands in this field and pressing Enter.		
Control			
	-n	Backward	
		The image area moves n lines toward the top line of the overlay, the record layout, or the page layout.	
	+n	Forward	
		The image area moves n lines toward the bottom line of the overlay, the record layout, or the page layout.	
	W-n	Left	
		The image area moves n columns toward the first column of the overlay, the record layout, or the page layout.	
	W+n	Right	
		The image area moves n columns toward the last column of the overlay, the record layout, or the page layout.	
	n	The image area moves to the nth line.	
	Wn	The image area moves to the nth column.	
	*TOP	The image area moves to the top line.	
	*BOT		
Mark		The image area moves to the bottom line. The element mark is displayed in this field. It could be either a system-assigned mark or a user-assigned name.	
Measurement method	This field shows the measurement method used to specify the position. You may change this field by pressing the F6 key.		
Start position	The position parameter consists of across and down values. These values specify the horizontal and vertical start position of the element being defined.
